First Baths

The Ideal Waste System is based on the scientific principle of equal water levels in communicating vessels. The height of the bath is lower, but the water depth remains the same. At just 48cm high, instead of standard height 55cm, these baths make getting in and out easier for everyone.

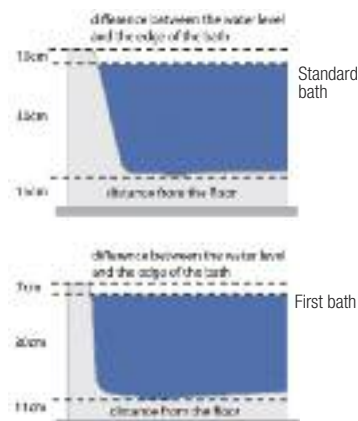

Hidden overflow system

The Ideal Waste System is based on the scientific principle of equal water levels in communicating vessels. The height of the bath is lower, but the water depth remains the same.
