

Government Boiler Scrappage Scheme

The Government has just announced a boiler scrappage scheme in England effective from 18 January 2010 administered by the Energy Saving Trust

- Householders can apply by phone or online for a **£400** voucher to use when replacing an old G rated boiler (that is in situ and working) with an A rated model
- The scheme is effective in **England** only and for 125,000 applicants on a first come first served basis
- A quote from a registered installer (GasSafe, OFTEC, Microgeneration Certification) etc is needed in order to apply
- Vouchers will have a unique number and will be valid for 12 weeks from date of issue. Those not redeemed from the EST timescale will expire - the £400 goes back into the pot
- G rated gas boilers and the equivalent standard for oil and LPG qualify (electric models are not included). For a full list of approved boilers ask a PTS member of staff. They are boilers that have a permanent pilot light
- Renewable source of heating or hot water will qualify
- The scheme links in with other grant schemes such as Warm Front and Low Carbon Buildings Programme
- Energy company offers can run along side and complement the scheme

The Government's Boiler Scrappage Scheme will:

- Help sustain work for the 130,000 installers and over 25 UK-based boiler manufacturers throughout the economic recovery
- Save money. A household's energy bill could be cut by between £200 to £235 a year
- Save carbon. Replacing 125,000 G rated boilers should save in the region of 140,000tCO₂ per year - equivalent to taking 45,000 cars off the road

Householders are responsible for registering and claiming not installers.

For more details, including how to register for a voucher visit
